

Introducing Walthers Gold

Line™ HO Scale Freight Cars

- Better operation
- Enhanced appearance
- Colorful new paint and lettering schemes
- Factory assembled
- Add-on grab irons included

Meet the new Walthers Gold Line™ HO Scale freight cars for 2004-05!

These new cars include turned metal wheelsets to enhance their on-track performance and appearance. Plus, each comes with the correct 28, 33 or 36" diameter wheels matching what's used on the actual equipment.

Closer in size and shape to the couplers used on the prototypes, these new McHenry® semi-scale couplers take Walthers Gold Line freight cars to a new level of realism. Knuckles come molded in realistic color and feature durable metal springs in place of "plastic fingers."

And if you demand the ultimate in realistic detail for your models, Walthers Gold Line cars include a complete set of preformed add-on wire grab irons. Molded-in drill starter points on each body make them easy to install.

Coupled with fine details and authentic paint schemes, these new models are a must-have for any railroad that moves freight!

932-962

Cushion Coil Car 3-Packs

Limited-Run
Sept 2004 \$59.98

Classified as both gondolas and flat cars, coil cars feature a "V"-shaped cradle in place of the usual floor. On the prototypes, adjustable retainers hold the coils in place. A cushion underframe helps prevent end-to-end load shifting.

Roadnames: EJ&E; CNW

932-4472

Ore Car 12-Packs

Sept 2004 \$79.98

Based on Great Lakes "Minnesota" cars that served the Missabe range. Equally at home in iron mines or mills, many are still used. Set includes 12 new numbers.

Roadnames: DM&IR; UP

932-7270
