

SCENEMASTER HO SCALE
CITY ACCESSORIES
949-4121

Thanks for purchasing this Walther's SceneMaster kit. Please read these instructions and study the drawings before starting. All parts are styrene so use compatible glue and paint. We recommend assembling parts first, then painting the completed unit before final installation. Cities are always growing and changing as residents require more services and conveniences. Many, such as fire hydrants and parking meters become part of the urban landscape and are often overlooked, but are still essential. Others are provided as a courtesy to customers, such as bike racks and trashcans, or the familiar corner collection boxes of the Postal Service. This set includes a variety of items that can be used to add extra realism to city streets from the 1960s to the present day, or as add-on details in and outside of businesses. Visit your local hobby shop; see the latest Walther's HO Model Railroad Reference Book or log onto walther.com for more Walther's SceneMaster models to detail your layout.

DECALING

1. After cutting out the decal, dip in water for 10 seconds, remove and let stand for 1 minute. Slide decal onto surface, position and then blot off any excess water.
2. Lightly brush Micro Sol® on top. This will soften the decal allowing it to conform to irregular surfaces. **DO NOT TOUCH DECAL** while wet!
3. When the decal is thoroughly dry, check for any trapped air bubbles. Prick them with the point of a small pin or hobby knife blade and apply more Micro Sol®.
